Summary

Professional Software Engineer specializing in Information Systems with 4 years of experience. Adept in all stages of the development cycle for dynamic front-end web applications with a back-end structure. Possesses a clear knowledge of Computer Science principles such as software engineering, object-oriented programming, and data structures. Reliable as both a communicative team member and an independent developer within the Agile software development life cycle.

Education

University of California, Irvine | Irvine, CA **December 2016**
Bachelor of Science in Computer Science
Specialization in Information Systems

Orange Coast College | Costa Mesa, CA **December 2014**
Associates of Arts

Experience

OC Web Kings | Newport Beach, CA **August 2015 - Present**
Web / Mobile App Developer

- Maintained 10+ web projects by developing them from the ground up both front-end and back-end, improving upon existing web applications, and troubleshooting software with technical issues
- Developed 5+ PHP web sites and applications with languages HTML/CSS, JavaScript, jQuery, AJAX, SQL, tools Laravel, PHP Storm, MySQL, and Git, and MVC architecture within 4 years
- Assisted in the development of 5+ WordPress sites by creating new web pages and content, implementing new plugins to improve UX, and resolving issues from the back-end within 2 years
- Cooperated with designers to take their lo- and hi-fidelity design mockups and wireframes that lay out user interface and encompass UX, and implement them pixel by pixel onto projects
- Prioritized web sites and applications to be viewable and interactive on different screen sizes and mobile devices using responsive web design and media queries
- Utilized PHP, jQuery, Laravel, and MySQL to overhaul a company's website's architecture, design, and UX to a style that modernizes its representation and resonates with users, and optimized its SEO to raise its page ranking to the first or second page on search engines

Technical Skills

Languages: C, C++, Java, Python, SQL, XML, HTML/CSS, LESS/Sass, JavaScript, jQuery, PHP, Liquid
Tools: Microsoft Visual Studio, IDLE, jGRASP, Notepad++, PHP Storm, MySQL, Microsoft SQL Server, WordPress, Shopify, Git, WAMP
